

EFFICIENCY

VICTAS (ViO Crawler Technology by Advanced Stability)

VICTAS provides an expanded track gauge for more stability without increasing undercarriage width, and the short-pitch rubber crawler permits more comfortable traveling.

Integrated boom-light is protected from damage.

Large opening rear hood for easier maintenance.

Battery, fuel and hydraulic oil can be checked more conveniently.

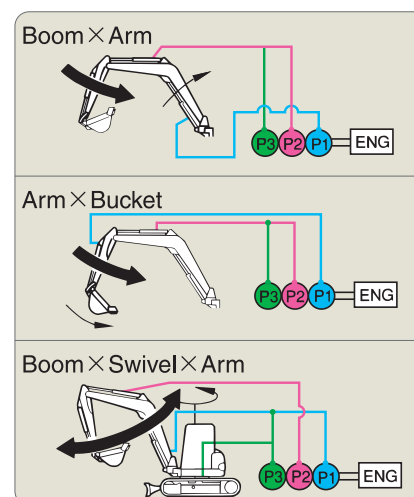

Removable side frame cover and side weight for easier maintenance.

Angled crawler frame reduces unwanted build up of foreign matter.

VIPPS (ViO Progressive 3-Pump System) increases power and speed, and increased fuel economy

Multi - function operation to increase on - the - jobs productivity.

AMENITIES

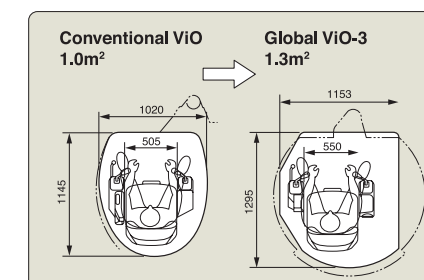

Large Comfortable Operating Space

The ViO20-3 offer lots of room for maximum comfort and productivity.

Comfortable Way to Work

The hydraulic control levers are carefully positioned to permit easy entry and exit to and from the work station.

Joystick pilot controls with arm rests are convenient to use and reduce operator fatigue.
