

BOLIK

ULTRA SPEED!

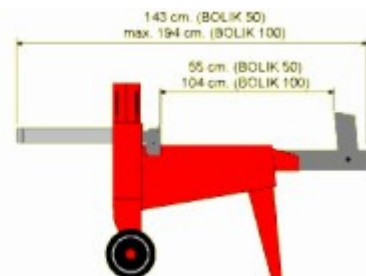

BOLIK 50 "US" and **BOLIK 100 "US"**, the horizontal log splitters with an innovative concept, suitable for the professional and home use. A strong structure in an agreeable shape together with a great active and passive security make **BOLIK "US"** a machine leader in his category, comfortable to be operated and moved in the working environment, with special technical feature to perform the way to work at the maximum level!

First of all, the automatic double speed, on both BOLIK 50 and 100 make **BOLIK "US"** extremely suitable for high working performances.

The model **BOLIK 50 "US"** is the ground version, with reduced shipping dimensions to improve the transport. The foot and axle extension is optional for this model, while it is standard on **BOLIK 100 "US"** on which also the height of the operating control is adjustable: from 104 to 110 cm. Moreover, the wedge can be adjusted at 4 different lengths for 4 log capacities! (on the model BOLIK 50 "US" instead, the wedge is fixed).

The power of thrust is not less important than the above features. 8 tons grant the user to split even the strongest and hardest wood!

- Automatic double speed
- Reduced shipping dimensions
- Adjustable height of operating control: 104/110 cm
- Re-entering hydraulic cylinder
- Sliding wedge
- Collecting wood plate (optional)
